Office

Faculty and Students!

We rarely spend as much time and consideration on our visuals as our written works. In this talk, Clayton Moore from BioRender will provide some tips and tricks on designing easily understood figures. He will showcase design principles to consider when creating figures and how to present them during internal meetings, investor calls, and external conferences.

Clayton is a scientific communications specialist with degrees in molecular biology & genetics, and bioinformatics from the University of Guelph.

College of Agriculture & Applied Sciences
UtahStateUniversity.
