## Electrical Engineering Student Wins \$25,000 Drone Competition

Engineering undergrad Kevin Plaizier won \$25,000 for designing a drone. He's been an active member of the AggieAir program for over two years and has been flying drones since high school. (Photo: Matt Jensen).

## Regulations and battery technology standing in the way of making more advanced drones, expert says

"Drone racing is getting more popular. There are local Utah races that are held every year. Over the summer, they do them about once a month," Plaizier said.
