Climate and Climate Change students gather to discuss projects

USU Climate Professor Teaches Climate and Climate Change at NCHU

December 14 - 31, 2020

For the third consecutive year, USU offers popular Climate and Climate Change course to 30 students at NCHU.

This course emphasizes physical basis of climate (climate dynamics), as well as the mechanisms and processes for its fluctuations on sub-seasonal to interannual time scales (climate variations) and on regional to hemispheric/global time scales.
