“Wonderful Life and Cool Research at USU” Presented by USU M.S. student J.J. Chen

December 18-19, 2019

The presentations, life and research at USU, was given in the IBPA and horticulture science department of NCHU to share live, studies, and researches at Utah State University. Besides, a discussion session was held after each presentation to answer the questions from students. Students joined activities had positive feedback to the presentation and were interested in studying graduate school in USU.
