## NCHU Faculty as a short-term visiting scholar at USU

**July 6 – October 4, 2019**

Dr. Kuo-Jung Chao (NCHU), a researcher in forest dynamics, is visiting USU for three months. She is hosted by the Department of Wildland Resources and iPACE. Her main collaborator is Dr. Eugene Schupp who is specialized in plant and restoration ecology. They are working together to understand the role of forest canopy gaps to forest biodiversity.
